euroflex vapour

Vapour is the state of water when heated to very high temperatures. The Euroflex steam cleaning range is appropriately named Vapour because our pre-made steam boiler technology **superheats water to 130°C** creating a hotter and drier steam compared to all other brands that use a drip feed system to create steam.

For effective work, a steam cleaner should deliver 4 functions: ultra hot steam, no loss of steam pressure, dry fast without streaks, disinfect and sanitize properly. Others may claim to be good at one of the above, but the essence of steam cleaning requires all of these features to be combined in one single machine.

Exclusive high quality microfiber pads have integrated moisture linen.

Euroflex steam cleaner is safe to use on all types of sealed hard floors leaving them quick to dry and streak free.

Our design includes the following technologies:

- **Pre-made Steam Boiler Technology – Ultra Hot Steam.** The steam is produced pressurizing the water into a high grade stainless-steel boiler (also called a steam generator) that superheats water up to **150°C** allowing steam to be hotter and drier than other brands
- **Pre-clean Steam Technology – Frontal and Edge Action System.** The exclusive frontal steam jets pre-clean flat surface and gets into edge and corners to deeply clean and sanitize where other steam cleaners don't.
- **Hot Plate Moisture Reducing Technology – Steam Dry Fast without Streaks.** Every model is equipped with a hot plate underneath the base that acts as a heat booster to remove dirt faster. The hot plate also helps to dry out accumulating moisture on the pad for a streak free finish.
- **Steam Booster Technology – No Loss of Power.** The steam booster technology keeps the steam pressure constant. Every time steam is released, extra heating power is added to the regular heating element. The steam pressure remains constant and the steam maintains the same temperature for as long as the steam cleaner operates.

Longer Life:

The boiler construction eliminates rust, corrosion and limescale build up for a longer product life.

Ready - Made Steam:

Pre-made steam is stored and kept super hot ready for use.

Energy Efficient:

Vapour is thermostatically controlled to save on power costs.

ENERGY

SAVING

Eco-Friendly Operation

Extraordinary allies for your housework, friends of the environment, champions of lighter water and electricity bills. The ecological Euroflex household appliances consume less energy and water avoiding useless wastes, maintaining standards of efficiency and quality at high levels compared to traditional products.

GREATER SAVING
=
LESS EMISSIONS

Euroflex household appliances have a great green heart. They contribute to reducing carbon dioxide emissions in the atmosphere by saving energy ensuring a healthier planet. To further protect our environment Euroflex doesn't use dangerous materials such as: mercury, lead, chromium, etc.

The only upright floor steam cleaner with:

- Frontal steam jets for extended reach (deep cleans baseboards, nooks and crannies).
- Pressurized stainless steel steam generator for maximum superheated steam power.
- Moisture reducing hot plate technology for perfect moisture while cleaning.

vapour^{M2R}

Ultra Dry Steam Floors Dry Fast Without Streaks

The Vapour M2R is an upright steam cleaner that is ideal for washing sealed hard surface floors and refreshing carpets and rugs, without the use of harsh chemical-based cleaners.

The **super heated steam** softens and loosens dirt while the washable microfiber pad lifts the dirt away.

The **frontal steam jets** give extra steam power for stubborn dirt or to clean floor edges.

The **Moisture Reducing Hot Plate Technology** delivers the perfect combination of moisture and heat, while ensuring floors are deep cleaned with a streak free finish.

vapour^{M3S}

Truly Sanitize & Disinfecting on Contact.

The Vapour M3S floor steamer is revolutionary due to its [dual-tank design](#).

The first tank is a durable stainless steel boiler that superheats water to generate a hot and drier steam that cleans floors, is quick to dry and leaves floors streak free.

The second tank holds the biodegradable Antibak solution that is laboratory tested and certified to kill up to 99.9% of a broad spectrum of bacteria.

While other brands of floor steamers claim that they truly sanitize under normal use, the fact is that they don't!

Vapour M3S infuses the germ killing action of Antibak with the power of steam to disinfect floors.

[Antibak's formulation](#) creates a barrier that protects against bacterial spores from growing for up to 28 days after application.

Antibak: a powerful germ killer.

Safe

Non-toxic

100% biodegradable

It creates a barrier against germs
and bacteria for up to 28 days

Laboratory tested under European
standards to kill up to 99.99% of a
broad spectrum of bacteria.

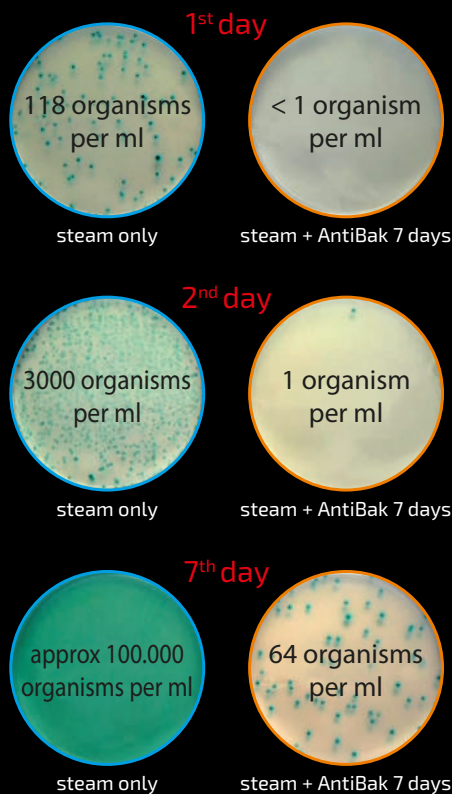

Use Vapour M35 without
the Antibak solution
for day to day cleaning
and with the Antibak for
deep sanitizing.

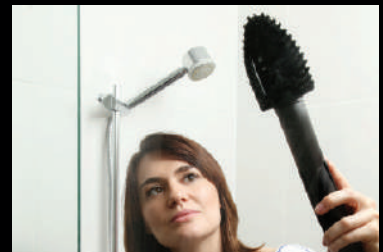

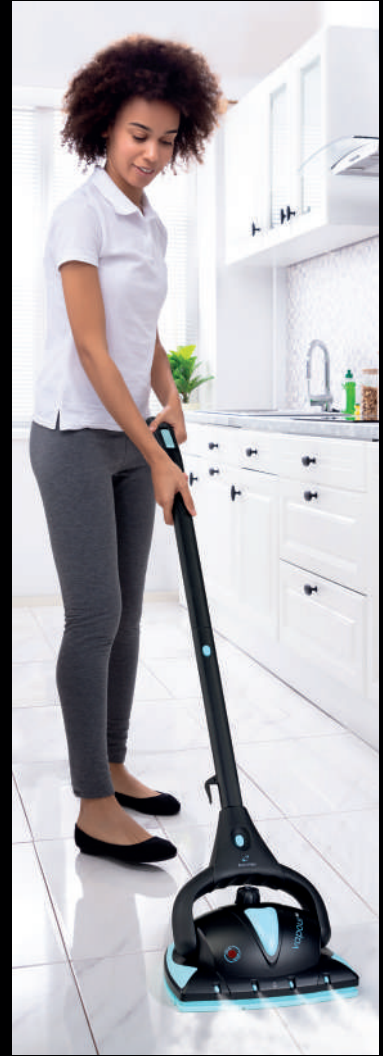

vapour^{M3S}

Truly Sanitize & Disinfecting on Contact.

The Antibak 28 technology makes the pressurized steam even more powerful. The machine on demand, automatically mixes steam with Antibak an exclusive bio-degradable sanitizing and disinfecting agent that empowers the steam to effectively kill germs and bacteria including super bacteria like MRSA, Novovirus, CoronaVirus, E-coli etc on virtually any surface.

Bacterial Growth

vapour^{M4S}

Hybrid Steam Cleaner

The Vapour M4S is a powerful and efficient appliance to clean the whole house from floor to ceiling without the use of toxic detergents.

As a floor cleaner it cleans all types of sealed hard floors leaving them quick to dry and streak free. It is safe to use on timber and laminate floorboards.

As a steam cleaner it has multipurpose use and comes with a full range of accessories to clean and sanitize any home surface, including tools for windows and grout cleaning.

**THERMAL TRANSFER
TECHNOLOGY**
THE POWER OF HEAT

CLEAN AND SANITIZE
HARD FLOOR

thermal^{x1}

Thermal is the ultimate solution to clean hard floors. It is the first tool that uses heat to deep clean floors. Clean with the power of the heat.

Exothermic Technology

In thermodynamics, the exothermic process describes a reaction that releases energy, usually in the form of heat, from the system to its surroundings. THERMAL X1 transfers the heat from its aluminum plate (reaching 250°F/120°C) to the pad underneath, creating enough energy to clean hard surfaces in the fastest, effortless and the most efficient way possible.

THERMAL X1 works with a precise amount of water in order to create ideal moisture for cleaning: only 20 OZ/100 ML of water is needed to clean up to 1000 SF/90 MQ. Thanks to Exothermic Technology, THERMAL X1 avoids limescale formation.
